Flavored Capsules Available

INCREASE COMPLIANCE WITH YOUR PATIENTS

Wedgewood Pharmacy, one of the nation's largest compounding pharmacies, announces the introduction of chicken-flavored capsules. A Wedgewood exclusive aimed at increasing compliance among veterinary patients, the chicken flavoring is currently available for Diethylstilbestrol (DES) 1mg and Cisapride 5mg capsules. Since it is the actual capsule and not the medication inside that contains flavoring, patients will taste the chicken flavor as soon as the pill is administered. "Total patient compliance is always the goal regardless of who you are treating," said George Malmberg RPh, CEO of Wedgewood Pharmacy. "Offering another palatable treatment option for veterinary patients gets us one step closer to meeting that goal."

Trusted by over 17,000 doctors nationwide, Wedgewood Pharmacy specializes in compounding medications that would otherwise be difficult to obtain such as Trilostane, Cyclosporine, and Methimazole.

For additional information about Wedgewood Pharmacy and the preparations we offer, please contact us at 800-331-8272, 9am-8pm EST Monday through Friday and 9am-5pm EST on Saturday. You can also visit us on the web at [www.wedgewoodpharmacy.com](http://www.wedgewoodpharmacy.com)
